SoCryptic INNOVATION

The art of understanding the needs of our clients and adapt to it, always anticipating several moves ahead on the changes and technological breakthroughs, made all our uniqueness and allows us to provide innovative solutions totally secure and unique customized day to day customized offers.

Our company established in 2013 is a French startup mainly focused in cyber security solutions for mobile devices (Smart phones, Tablets).

Always at the forefront of innovation, backed by an ambitious team of highest level professionals who has nothing more to prove themselves in the field of new information technologies, we strive to surround ourselves with the best! This is the reason why we have established a program of Research & Development in partnership with leading national and international universities.

We start where others stop !

SoCryptic Innovation owns four patents.
Listening to our customers and in full coordination with them we customize our services to their needs.

Our team of "top gun" professionals :
